# GRADE A CHICKEN AT THE BEST PRICE & THE HIGHEST NUMBER OF CHICKS PER M<sup>2</sup>

The Hubbard JV package combines robustness of the broilers and productivity of the parent stock with the most economic and predictable production of 1 kg of Grade A broilers.

The JV broiler brings good **growth, FCR and hardiness** under tough conditions together. These characteristics makes it a chicken perfectly suited for **the whole "grilled or roasted" chicken market.**

The undisputed dwarf concept of the parent stock female allows to produce **20% more day-old-chicks** without investing in new breeder houses. In a context of high feed costs, the **feed savings** are consistent and up to **25% per chick produced.**
